Full-stack web developer with database design expertise and advanced data structures. Experience in software, web and mobile app development. Programming graduate at HoGent focused on securing an internship.

EDUCATION

High school diploma **2024**
Het Spectrum Ghent

Graduate certificate **expected 2027**
HOGENT Ghent

WORK EXPERIENCE

Packing **01/2026 – Present**
Tropack Ghent

- Packaged products for shipments.

PROJECTS

Webshop pc-buy | **Laravel, PHP, MariaDB, Bootstrap, Tailwind CSS, Mollie** **2026**

- Built an full stack example webshop for computers and hardware, covering product browsing, ordering and online payment, using Laravel's MVC architecture and routing.
- Implemented secure online payments with the Mollie API, using webhooks to process payment status updates and send confirmation emails automatically
- Designed the database in MariaDB and built a responsive UI by combining Bootstrap components with Tailwind CSS

Quiz app | **React Native, TypeScript, Expo** **2026**

- Developed a mobile quiz app with multiple categories and score tracking, with a clean multi-screen navigation structure
- Managed state across screens and applied strict TypeScript types and interfaces to keep the codebase maintainable and reduce bugs
